

Vital Sta'tis'tiks

June shows a slight reduction in the number of commercials through the labs compared with May, however the feature figures remain pretty static. 35mm stock is still predominant due in the main to commercial users.

We would like to thank the laboratories for the information they have supplied this year. So once again we present our research on the number of Features, TV programmes, Commercials and Corporate Productions made in a particular month.

We make no attempt to identify the title of the production, or the production house or any other information as this is often confidential information – we supply simply the number.

We rely on the co-operation of broadcasters, suppliers of commercial material to broadcasters and local film laboratories for information, however at the moment local broadcasters are not forthcoming in providing these vital statistics.

Efforts will continue to be made to build on this statistical data base in order to improve the accuracy, and should readers have comments, or other ideas in terms of statistic gathering, please send an e-mail to web@screenafrica.com. Your comments would be appreciated.
