

Cape Town reports that the last negative for *The Lost Future* has been processed, and that there is a drop off in feature work with no features scheduled for May. Students did however submit an impressive number of short films before festivals. 19 International commercials were processed, with most local commercials being shot on 16mm. Commercial work is generally down.

Johannesburg is still processing *Spud*. Commercials have remained fairly constant.

The commercials submitted by Media Host have increased significantly in relation to the same period last year. We would like to thank the laboratories and Media Host for the information they have supplied to us. We make no attempt to identify the title of the production, or the production house or any other information as this is often confidential information – we simply supply the numbers.
