

Cape Town reports that no feature work had commenced in January, although an upcoming feature, *Lost Future*, was scheduled for February. All processing centred around commercials (mostly international), however considerably more local commercials were processed than in the same period in 2009. A point of interest is that some commercials are shooting both 16mm and 35mm now. Three perf. is also being used, but only on about 10% of the workflow.

Johannesburg also remains without a feature for January, but two shorts were processed. Commercials too have shown an upswing over December and there was one documentary. The commercials submitted by Media Host have also dropped off for January, however the number is still higher than the same period last year.

We would like to thank the laboratories and Media Host for the information they have supplied to us. We make no attempt to

identify the title of the production, or the production house or any other information as this is often confidential information – we supply simply the numbers.

Statistics for January 2010

Through the labs:

Johannesburg.

Features	Shorts	Commercials	Doccies	16mm	35mm
0	2	26	1	8	21

Cape Town.
