

April statistics show that the Cape Town lab is proving to be a popular destination for international features and commercial clients with figures up for this period. Cape Town has a new Lab manager, Derick Olivier who says they completed six features in March including Glamour and Glory, Kennedys Brain, Cousins and Summer in Cape Town – all 16mm productions – and Free Willy 4 and Janja Weed both 35mm productions.

Johannesburg, whilst not having any feature work for the period, has increased its commercial throughput as well as documentary work shot mainly on 16mm. The commercials submitted by Media Host have also increased somewhat from the previous period, indicating the trend shown by the labs of increased commercial work.

We would like to thank the laboratories and Media Host for the information they have supplied. We make no attempt to identify the title of the production, or the production house or any other information as this is often confidential information – we supply simply the numbers.
