

The World Cup has come and gone. It would seem that things are now returning to normal for this time of year at the **Cape Town** Lab. Processing started on the feature *Dark Tide* which is interesting as most of this feature will be shot on the cost saving 2-Perf format. There have also been two international commercials.

**Johannesburg** is still processing *Winnie* which is being telecined at The Refinery. The decline in commercials seems to be continuing for the time being.

The number of commercials submitted by Media Host however shows an increase from last month.

We would like to thank the laboratories and Media Host for the information they have supplied to us.
